MuxLab 500709-TX HDMI 2.0 over IP SDVoE Transmitter enables the distribution of content to an unlimited number of displays over a 10Gb Ethernet switch. It is a versatile solution for extending video and audio transmission over long distances. It can extend video and audio transmission distance up to 300m (OM3) / 400m (OM4) over fiber and supports Ultra-HD 4K2K@60(4:4:4) format, providing high-quality visuals.

The HDMI 2.0 over IP SDVoE is a comprehensive solution for demanding applications that require reliable, high-quality Ultra-HD video broadcasting over an IP network, with added features such as RS-232 pass-through and video wall support.

- Supports HDMI resolutions up to 4K/60(4:4:4)
- SDVoE Technology
- Uncompressed up to 4K/60 (4:2:0), and light compression visually lossless at (4:4:4) (with zero latency)
- Extends the transmission over multi-mode optical cable up to 300m (OM3) /400m (OM4)
- Full duplex RS-232 control up to 115,200 bps
- Supports Videowalls
- Managed via MuxLab Network Controller(500812) and Muximus Network Controller(500813)
