WALL SUSPENSION ELEMENTS

Universal wall suspension element suitable for small plastic enclosures with a flat base. The adapter ($45 \times 58 \text{ mm}$) is attached to the enclosure with a double-sided adhesive foil*. This makes it possible to mount the enclosure quickly and easily on the holder, which can be screwed to the wall - attachment with adhesive foils* is optionally also possible here (separate article available as an accessory). Removal protection by means of a locking pin.

*Customised foils consisting of double-sided adhesive foil with foam rubber carrier.

Supply

1 adapter, 2 adhesive foils, 1 holder, 2 locking pins
