SMART-TERMINAL 160

Robust and elegant enclosure with two-part aluminium profile (glass bead-blasted and anodised), designer seals in volcano and lava grey plastic side covers. Good access inside for installation and assembly work.

Horizontal guides and screw channels provided inside the case for fitting PCBs. Flat areas for easy installation of interfaces. Recessed area in the top for the protection of displays, membrane keypads and operating elements. Side covers with recessed area for protecting cables and connectors.

Each case is supplied with an assembly kit which includes the enclosure screws and sealing washers, plus two round cord seals for fitting between the top and the base profiles.

Accessories include a wall suspension element, case canting kit (for ergonomically canting the enclosure by 12°) and a set of square-head nuts for mounting a PCB or mounting plate.

Supply
Top profile, base profile, set of designer seals in volcano, set of side covers, assembly kit
