## WALL SUSPENSION ELEMENT

Two-piece design for secure and flush mounting of the SMART-TERMINAL enclosure.

Installation: Fix the anti-slip pads supplied (to prevent the enclosure from being pushed to the side) on the wall suspension element, and then screw the wall suspension element to the wall, or a flat machine front panel. Insert the tongue on the back of the enclosure, in the centre, and hang the enclosure onto the wall suspension element and mount on the wall or similar with a screw (not supplied).

Supply

1 wall suspension element, 1 wall suspension tongue, 2 anti-slip pads (self-adhesive)
