CARRYTEC M slim version Strong plastic enclosure with handle, slim version. Ideal for the installation of tablet computers and the like, which have modest space requirements and can be carried comfortably and securely in the Carrytec. The top part is identical with that of the larger enclosure versions; only the bottom part is flatter.

Top part with recessed surface for using membrane keyboards. Attachment domes for PCBs and components in the top and bottom parts. Interface installation at the rear, for example for support arm applications, ensures orderly cable routing through enclosure connection.

Supply Top and bottom parts, TPE handle pad, assembly kit
