CONTROL-KNOBS 36 Innovative two-part plastic tuning knob design comprising a hard inner knob body made of high-quality PC and a soft-touch TPE outer shell with functional grooved appearance.

Suitable for rotary potentiometers and encoders with round shaft ends in accordance with DIN 41591. Collet system allows easy installation of the knob from the front. Continuous hole type. If required, the base (accessory) can be used on the operating panel for an elegant floating appearance.

Version Traffic white colour optic ring on the top surface with pointer line on the side

Supply 1 knob (minimum components for 1 CONTROL-KNOB: 1 knob, 1 cover, 1 base if required)
