

OKW CONTROL-KNOB Base 46

PA 6, volcano

Tuotekoodi: B7546208

EAN:

Valmistaja: OKW

B7546208

Base 46 Suitable for all CONTROL-KNOBS 46. Additional machining of front panel/enclosure front is required (hole for potentiometer spindle and slot for anti-rotation device).

Use:

- Mandatory for "CONTROL-KNOBS 46, optional illumination" for installing the LED illumination.
- On request, can also be used for all "CONTROL-KNOBS 46 without illumination". Here, the base provides additional space between the knob and the operating panel for an elegant floating appearance.

Supply 1 base
