Pressure equalisation element M10x1
Pressure equalisation elements with highly improved air exchange for protecting sensitive electronics. Changing atmospheric conditions and a sudden decrease in temperature can cause underpressure inside protective housings of technical equipment. Water and dirt can penetrate the gaskets damaging electronics in the process. The patented IQ TEX® technology is the ideal solution for urgent pressure balancing in large control cabinets and all protective housings. At the same time the innovative construction of IQ TEX® protects against foreign material and dirt. If required, it is absolutely watertight up to a pressure of 6 bar.

Airflow: 19.5 L/min - 0.25 bar; 43.5 L/min - 1 bar.

Water entry pressure > 6 bar.

Temperature range -40°C/+110°C.

Sealing material: BASF Luquafleece + PA6 mesh (insert molding).

Supply 1 pressure equalisation element, 1 seal washer, 1 nut
