SMART-PANEL S114 Elegant two-part plastic enclosure with flat top part. Fastening pillars for PCBs and components in the top part. Bottom part with a series of pre-moulded cut-outs for assembly on standard flush-mounted/cavity wall boxes (machining required). Secure snap-in assembly of top and bottom parts. Rational assembly of the electronics. To open the enclosures easily and practically, we recommend that you use the opening tool set, which is available as an accessory. Recessed operating area protects a membrane keyboard or glass control panel. Due to the high-quality material (UL 94 V-0) and the elegant design, perfect for use in modern building services technology.
